

Umps Keysafe

Product datasheet | Australia

A combination key safe for keeping a spare house key outside the home, so emergency services or nominated contacts can get in when needed.

With Professional Response, Umps can keep the code and the key safe's location on file, so operators can pass them on after an alarm.

Product specifications

Model	AC02-AUBL/01
Dimensions	80 x 95 x 40 mm (W x H x D); 146 mm high with shackle
Colour	Black
Lock	Four-digit combination dials
Code change	Set by the user with the reset switch inside the key safe
Mounting	Removable shackle for a door handle or pole, or screw-fixed to a wall
Shackle opening	28 mm wide; fits around a handle, rail or pole up to 28 mm across
Screw fixing	Four screws and wall plugs supplied; some surfaces need a masonry drill
Code setup	Umps can set a chosen code before dispatch when ordered with a personal alarm
Supplied	Key safe, shackle, four screws and wall plugs, instructions

Use and care

Mount it out of sight but within easy reach for responders, such as near the front door. Share the code only with people who need it. If you have Professional Response, tell Umps whenever the code or location changes.
